Poolsealer KCberry

Waterproofing sealer for pool microcement

Pools

Waterproof barrier

Roller or brush

2 coats

≈ 0.15 L/m²

Description and use

Poolsealer KCberry is the component that protects the pool microcement system. It is applied after **Poolciment M** and creates the waterproof barrier that ensures the longevity and resistance of the coating against moisture and external agents. It is a mandatory component in every Poolciment project.

Properties and benefits

- **Waterproof barrier** over Poolciment.
- **Seals the porous areas** of the coating.
- **Simple application** by roller or brush.

Technical data

Property	Specification	Unit	Method / Standard
Function	Waterproofing sealer for Poolciment	—	—
Application	Roller or brush	—	—
Coats	2	—	—
Consumption	≈ 0.15	L/m ²	—
Full cure before filling	up to 7	days	—
Substrate	Dry Poolciment M	—	—
Packaging	5	L	—

Application

1	Substrate. Apply over the completed and sanded Poolciment M.
2	Apply. Using a roller or brush, cover the entire surface evenly, making sure all porous areas are sealed.
3	Second coat. Apply the second coat of Poolsealer with a short-pile roller.
4	Curing. Fill the pool only after full curing — up to 7 days.
